

# PRESENTATION PROBLEMS — CALCULUS III

last update: November 18, 2013

Note that the problem numbers that appear in the table are textbook numbers, not WeBWorK problem numbers. Asterisks \* indicate more conceptual problems. A successful presentation of a starred problem will involve much more *explanation* than *calculation*. Some problems depend on other presentation problems. For example 12.5.60 relies on the result of 12.5.56. This is indicated by parenthetical remarks.

*All presentations must be done  
in groups of 2 or 3, except by special request.*
